

XeneX SOCaaS

With over 12 years of experience and focus on Security Operations Center as a Service (SOCaaS), XeneX delivers a unique cybersecurity solution and unparalleled 7/24/365 SOC experience.

XeneX's software development team continues to extend the capabilities of XeneX platform. A leading industry platform, XeneX integrates several cybersecurity tools to achieve a single pane of glass of cybersecurity for the enterprise.

XeneX security analysts receive extensive training on the XeneX platform and must complete certification before joining the SOC team.

Malware Removal Service

XENEX
SOC - A - S - A - SERVICE

XeneX Malware Clean Up Service

Highlights

Comprehensive

Covers viruses, Trojans, ransomware, adware, spyware, and more.

Cost Effective

Affordable for any budget. From small interest to the largest interests. A scalable service.

Time-to-Market

Using automation to effectively and quickly detect malware. No manual processes.

Add Vulnerability Scan

Combine this service together with vulnerability scan service to ensure a clean and up-to-date environment.

Identify Cybersecurity Gaps

Address the cybersecurity gaps to create a roadmap to meet compliance requirements.

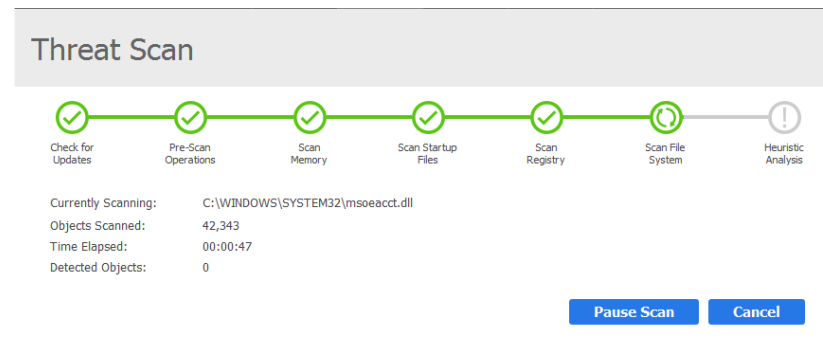

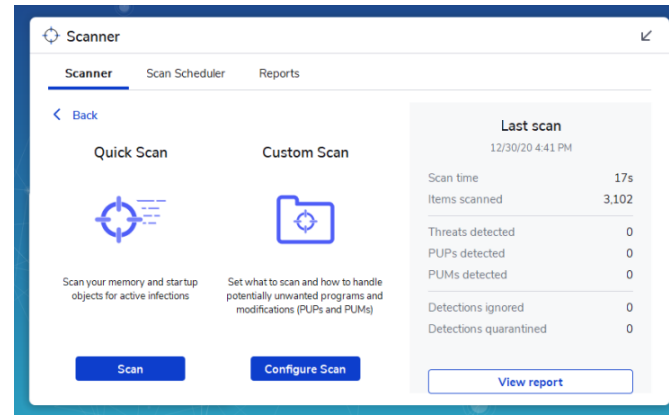

Are you at risk of undetected malware in your environment?

Yes, it is possible for malware to remain undetected in an environment for over 6 months or longer. In fact, according to the IBM X-Force Threat Intelligence Index, the average time to detect a data breach is 207 days, which is more than 6 months.

The reason why malware can go undetected for such a long time is because cybercriminals are becoming more sophisticated in their attacks. They use techniques such as polymorphism, which allows the malware to constantly change its appearance to evade detection, and fileless malware, which can infect a system without leaving any traces behind.

In addition, many organizations rely on traditional antivirus software to detect and prevent malware, but these tools are not always effective against the latest threats. Cybercriminals are constantly developing new malware variants that can evade traditional antivirus software.

XeneX, in partnership with Malwarebytes, is introducing a new service for cleaning up the environment from malware. Why Malwarebytes? Because Independent IT research firm MRG Effitas has given Malwarebytes the highest possible score (100%) in its Quarterly 360° Assessment & Certification.

Our Vision

Continuously invest in technology, people and process improvements to deliver the most comprehensive cybersecurity technology platform and world-class white glove service for incident management. To be the leading SOCaaS, protecting our partners and customers, and helping them achieve their cybersecurity goals.
